Pin High

How to use the app · a quick guide

Pin High tracks every shot you hit and shows where you gain and lose strokes. It works on your phone with no account, and it keeps working with no signal.

What's in this guide

1. Start a round
2. Log your shots on a hole
3. Tip: the putt that goes in (1-putts too)
4. Direction, penalties, layups and fixing a shot
5. Finish a hole, check your score mid-round, finish the round
6. Maps: fairways, greens, proximity and putts
7. Club Performance
8. The Stats page
9. PDF reports: the round PDF and the Stats PDF
10. My Bag
11. Benchmarks: who you compare against
12. Send a round, add a round, and live share
13. Rounds and Settings
14. Tips

The pictures use a made-up player, "Alex", and sample rounds.

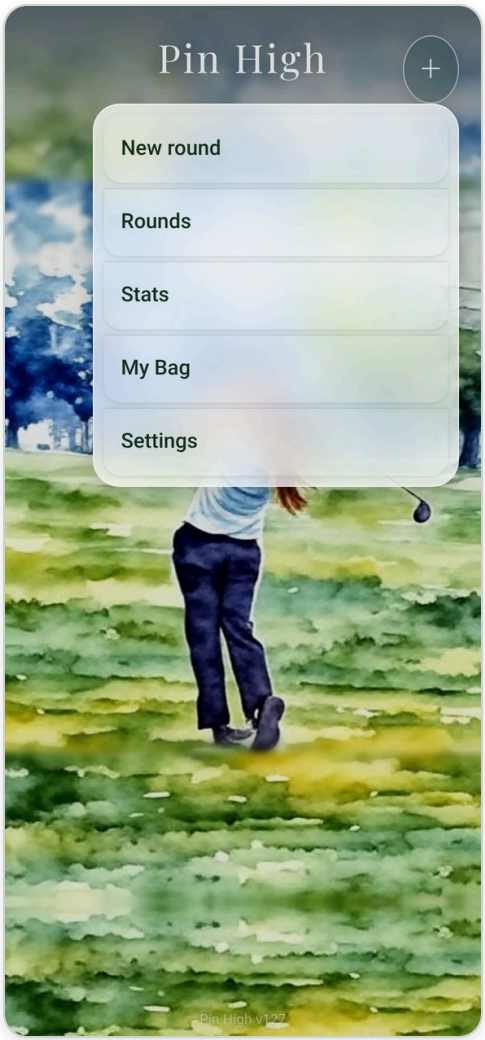

There's also a short video. *PinHigh-RoundEntry.mp4* shows a full hole being entered, from New round to hole 2.

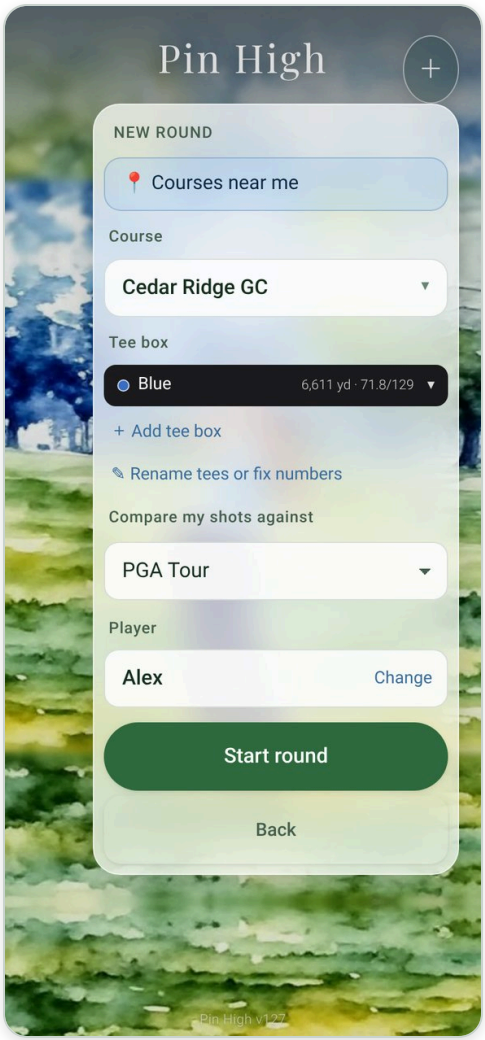

1. Start a round

1. On Home, tap **+**, then **New round**.
2. **Course:** pick a saved course, or tap 📍 **Courses near me**. It finds nearby courses and fills in the scorecard for you. Your location is used once, only for this, and isn't saved.
3. **Tee box:** tap your tee. Pin High remembers the tee you played last time at that course.
4. **Compare my shots against:** pick your benchmark (PGA Tour, LPGA, D1 college and so on). See section 11.
5. **Player:** the golfer's name. Tap **Change** to switch it.
6. Tap **Start round**.

If a course isn't found, tap ✎ **Type in par & yardages** and enter it yourself once. It's saved for next time.

If you leave a round, **Resume round** on Home takes you back to it.

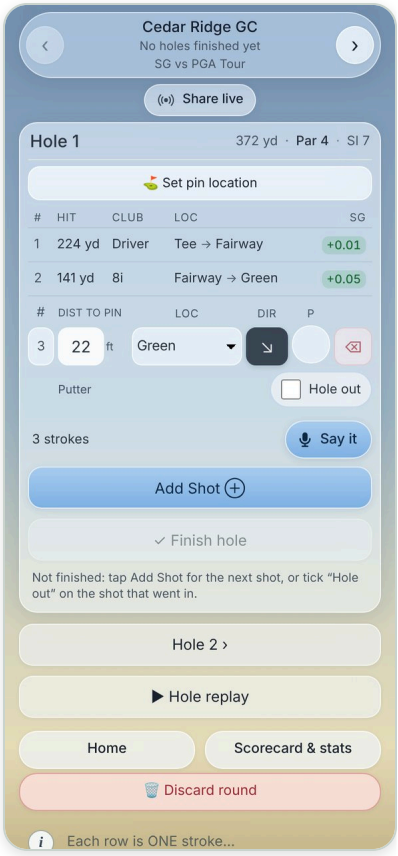

2. Log your shots on a hole

One row = one stroke. Each row says where you hit that shot *from*.

- **Row 1 is the tee shot.** The hole length is filled in from the scorecard. Pick the **Club**.
- Tap **Add Shot** ⊕ for every new stroke. Then enter:
  - **Dist to pin:** yards to the pin, or **feet** once you're on the green.
  - **Loc:** where the ball is: Fairway, Rough, Bunker, Green, Hazard, OB re-hit, Deep rough, Trees.
  - **Club:** optional, but it powers Club Performance. Under 100 yd you can pick from your wedge ladder if you've set one up in My Bag.
- **Putts:** add a row for each putt, with Loc = **Green** and the distance in feet.
- **The shot that went in:** on the last row, set Loc = **In the hole** with the length of that putt. If you holed out from off the green, tick **Hole out** on that row instead. **Important, see the tip in section 3.**

Done shots fold into one short line: **Hit · Club · From → To · SG**. The green or red number is the strokes gained for that shot.

Say it 🎤 lets you speak a shot instead of typing it.

3. Tip: the putt that goes in (1-putts too)

A hole only counts as done when one row says the ball went in.

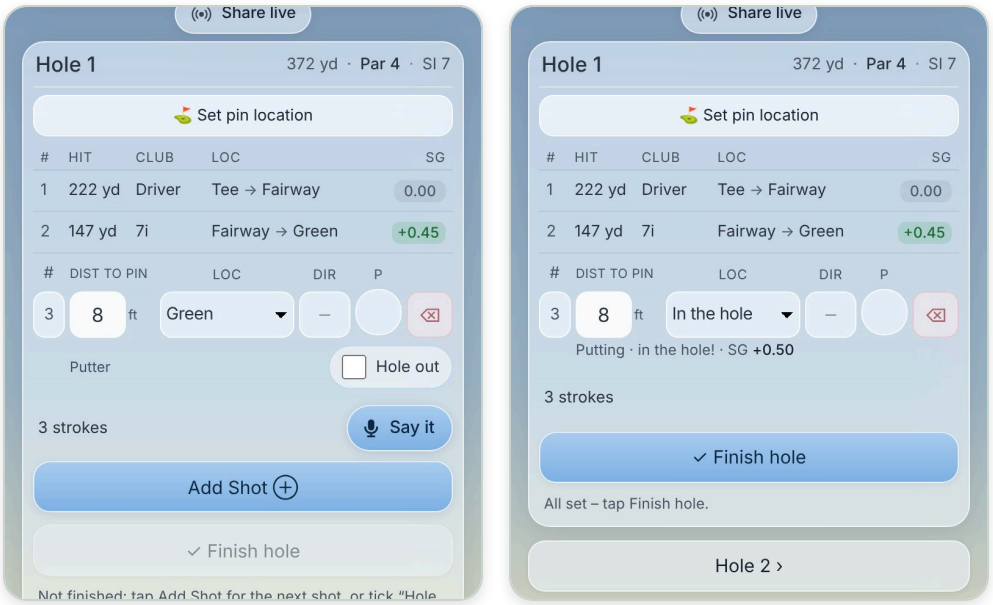

On the green it's natural to pick Loc = **Green**, and after a putt Pin High fills in **Green** for the next row for you. That's right for a putt that missed, but **not** for the putt that dropped.

On the last putt row (the one that went in), do one of these:

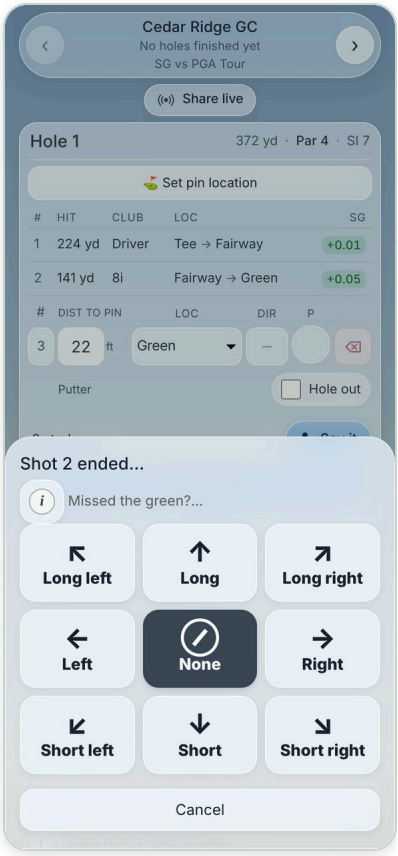

- change **Loc** to **In the hole**, or
- tick **Hole out** on that row.

Either one works. This matters most on a **1-putt**: the only putt row has to be marked, or the hole stays open.

If you forget, the hint under the buttons says *"Not finished: tap Add Shot for the next shot, or tick "Hole out" on the shot that went in."* and ✓ **Finish hole** stays greyed out (left picture). Once it's marked, the row reads **Green → Holed**, the hint says *"All set – tap Finish hole."* and you can finish (right picture).

4. Direction, penalties, layups and fixing a shot

Dir (direction): tap the arrow box on a row to say where the *previous* shot finished.

- **Short = toward you**, Long = past the target, plus Left, Right and the corners.
- An approach that missed the green: pick where it missed the green.
- On the green: pick where the ball stopped next to the hole. For a missed putt, pick where the putt finished.

P (penalty): tap **P** to add a +1 penalty stroke, for example a drop. **OB re-hit** adds the +1 for you, and you hit again from the same spot.

Layup: tick **Layup** on a par 4 or par 5 tee shot when you didn't hit driver on purpose. It doesn't count in your off-the-tee strokes gained or the fairway map. Your score doesn't change.

Fixing mistakes:

- Tap any folded shot line to open it and edit it.
- ⌫ deletes a shot. It asks first.
- Tap the **shot number** to insert a shot above or below.
- ⛳ **Set pin location** records where the flag was (front, middle, back, left or right).

5. Finish a hole, check your score mid-round, finish the round

Finish a hole: when every row is complete, tap ✔ **Finish hole**. You'll see the score, to par and strokes gained for the hole. The hint under the buttons tells you what's missing if it won't finish. ✎ **Edit this hole** reopens it.

Next hole: tap **Hole 2 ›** (or the **›** arrow at the top). **‹** goes back.

Check your score any time, mid-round: you don't have to finish first. Under every hole, tap **Scorecard & stats**. It shows the scorecard and stats for the holes played so far (for example "thru 9"). Tap **‹ Round** or **Back to the round** to carry on where you were.

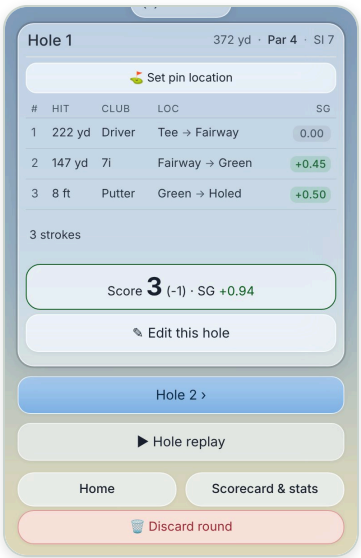

You can also tap **Home**, then **+** → **Stats** at any time to look at your past rounds. The round you're playing shows up on the Stats page once it's finished. **Resume round** on Home takes you back to the round.

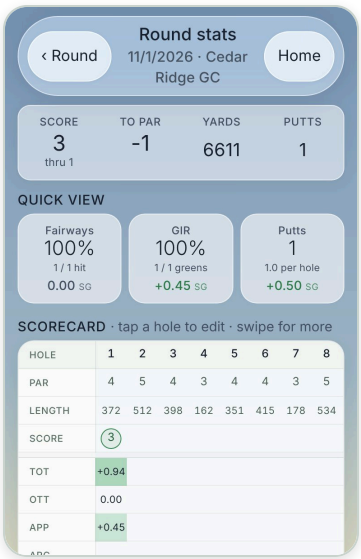

Finish the round: on hole 18, tap **Finish round – see stats**. Everything saves as you go.

Scorecard: swipe it sideways for holes 1–18, then OUT, IN and TOT.

- Score marks: circle = birdie, double circle = eagle or better, square = bogey, double square = double bogey or worse.
- The rows below show strokes gained by category (OTT, APP, ARG, PUTT), putts, GIR, club, fairway hit and drive distance.
- Tap any hole on the scorecard to open that hole.

At the top of a round: **Score · To par · Yards · Putts**, plus Quick view tiles for Fairways, GIR and Putts.

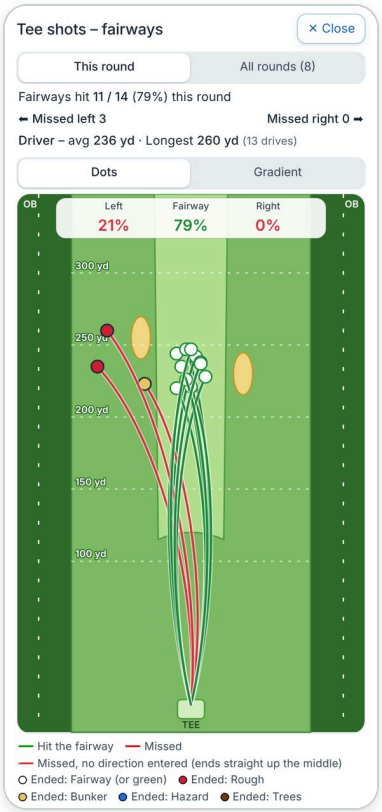

6. Maps: fairways, greens, proximity and putts

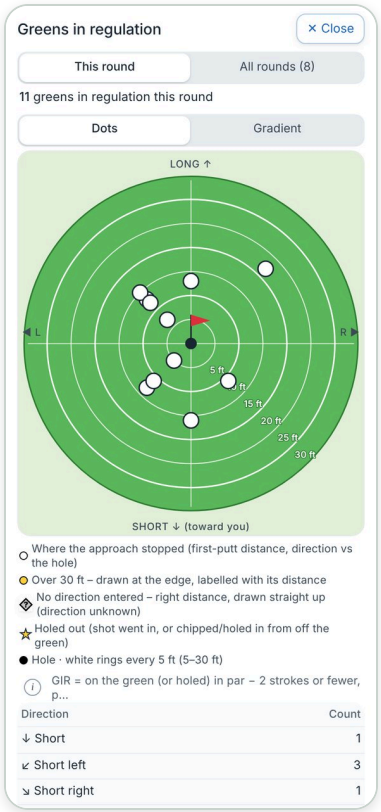

On a round's stats page, each **Stats** row opens when you tap it. Tap the tile inside to open its **map**. Every map has **This round / All rounds** at the top, and **✕ Close**.

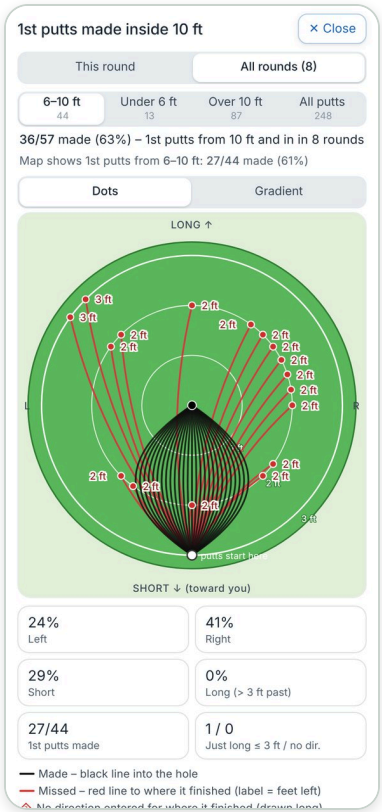

- **Fairways hit:** every par 4 and par 5 tee shot drawn as a line. Left miss %, fairway % and right miss % are shown across the top.
- **Greens in regulation:** where your approach stopped around the hole, with rings in feet. Misses show by direction.
- **Proximity:** how close your approaches finished, by distance (40–200 yd) and by lie. A red ring shows your benchmark's average.
- **Putts:** made putts are **black lines** into the hole, misses are **red lines** to where they stopped. Pick a distance (Under 6 ft, 6–10 ft, Over 10 ft) or **All putts**.

Most maps also have **Dots / Gradient**. Gradient is a heat map of where shots finished.

Other rows: Approach misses, Pin location, Putts, Lag putts, Penalty strokes and tee misses left/right.

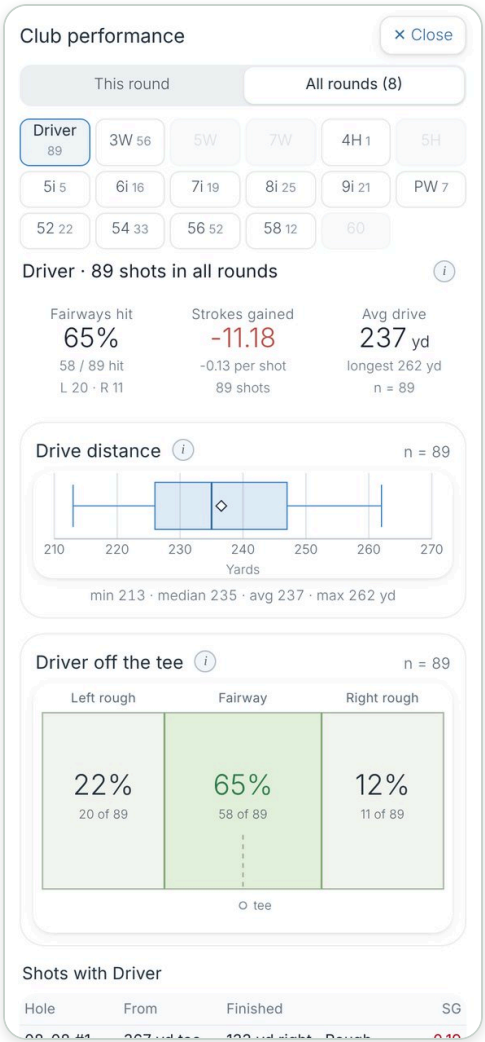

7. Club Performance

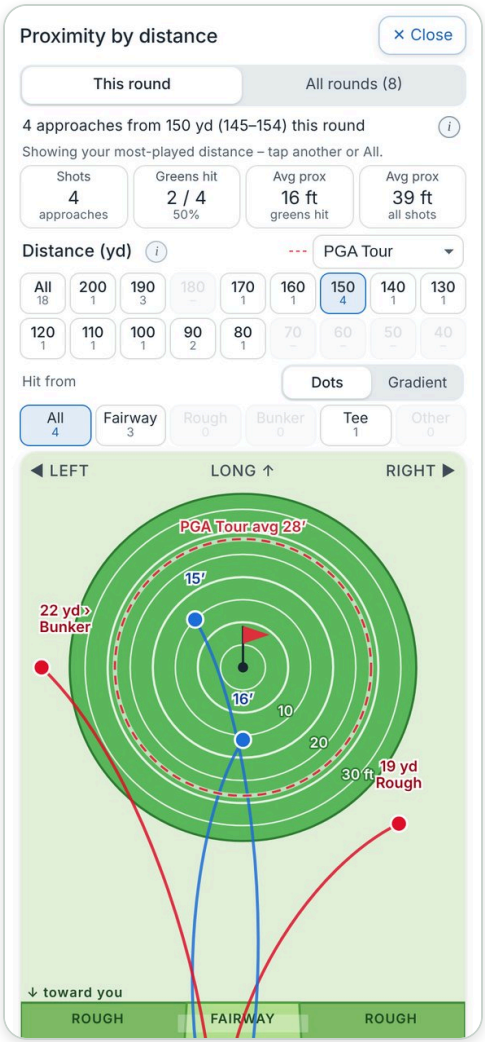

Open a round → **Stats** → **Club performance** → tap the tile. Then pick a club along the top. Small numbers show how many shots you have with each club.

- **Driver:** fairways hit %, strokes gained, average and longest drive, a box chart of drive distance, and a left rough · fairway · right rough picture.
- **Irons and hybrids:** greens hit %, strokes gained and proximity, with a dispersion map of where the shots finished around the pin.
- **Woods:** fairways hit % and strokes gained.
- It flags if you tend to finish **short or long** with a club, based on where the ball ended up.

Switch **This round / All rounds** at the top to see one round or your whole history.

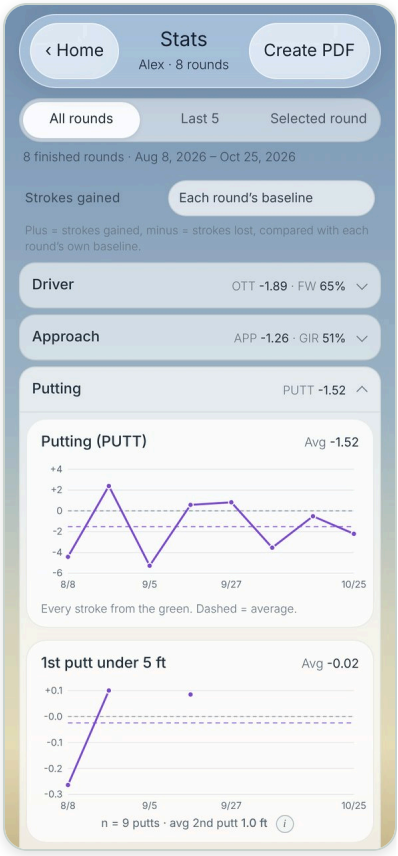

The **Proximity by distance** page (on the right) works the same way. Tap a distance and a lie to see how close you hit it from there.

8. The Stats page

Home → **+** → **Stats** shows trends across your rounds.

- **Which rounds: All rounds**, **Last 5**, or **Selected round** (pick one from the list).
- **Compare to all rounds:** with Last 5 or Selected round, turn this on to show all your rounds as a grey dashed line.
- **Five categories** open and close with a tap:
  - **Driver:** off-the-tee strokes gained, fairways and drive distance.
  - **Approach:** approach strokes gained, GIR and proximity.
  - **Putting:** putting strokes gained, results by first-putt distance, and the **Putt misses** grid (where your missed first putts go).
  - **Chipping:** shots from 30 yd and in, off the green, by lie and distance.
  - **Scoring:** total strokes gained and your par 3 / 4 / 5 scoring.
- Tap a dot on a graph to see that round.
- Small ⓘ buttons hide the longer explanations.
- **Create PDF** (top right) makes a printable report of everything on the page. See section 9.

9. PDF reports: the round PDF and the Stats PDF

There are two different PDFs. Both are made on the phone, with no internet needed.

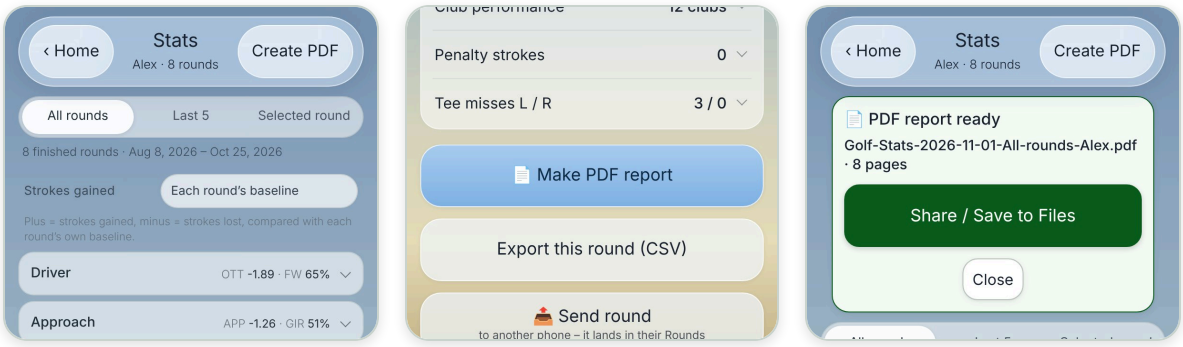

1. The Stats PDF: all your rounds (left picture)

- Where: Home → **+** → **Stats** → **Create PDF**, top right. It shows up once you have a finished round.
- It follows what you picked on the page: **All rounds**, **Last 5** or **Selected round**, plus the benchmark and Compare.
- What's in it: the averages table, then all five categories with their graphs (Driver, Approach, Putting with the putt-miss grids, Chipping, Scoring).
- On the Scoring graphs, your **last round** is drawn in colour over the grey dashed all-rounds line for par 3s, 4s and 5s.

2. The round PDF: one round (middle picture)

- Where: open a round (Rounds → tap it, or **Scorecard & stats** during a round), scroll down to **Stats**, and tap 📄 **Make PDF report**.
- What's in it: the score and Quick view, the scorecard with strokes gained, strokes gained by category and by distance, the same round against every benchmark, then the maps (fairways, greens, approach misses, pin location, proximity, 1st and 2nd putts). With more than one round saved, it adds all-rounds heat maps for tee shots and greens.

Both: it takes a few seconds. Then tap **Share / Save to Files** (right picture) to save it, print it, or send it.

10. My Bag

Home → **+** → **My Bag**. There are two tabs at the top: **Bag** and **Wedge ladder**.

Set up your bag

- Tap **+ Add clubs**, then pick the brand, model and clubs. Each club's **loft** is filled in with a typical number, and you can change it. Use "Other brand" or "Model not listed" for anything else.
- Type each club's **carry** in yards. Sort with **By club** or **By carry**.
- Tap a club to change its name, loft or brand, or to **Remove** it.

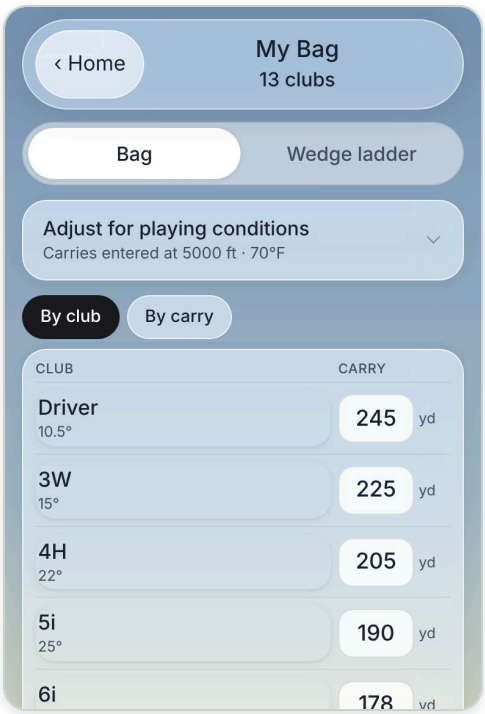

Playing somewhere else? Open **Adjust for playing conditions**. Set where you measured your carries (it starts at 5,000 ft and 70°F; tap **Change**). Then move the **Elevation** and **Temperature** sliders to see how far each club should carry there. Wind and soft or firm ground aren't included.

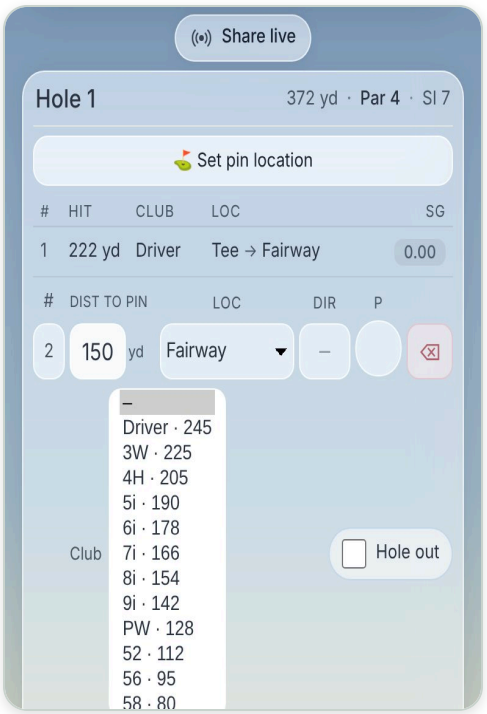

In a round (right picture)

- Once your bag has clubs, the **Club** picker lists only your clubs. There's no putter, because putts don't need a club.
- Tick **Show these carries in the club picker during a round** to see each club's carry next to it, for example **7i · 166**.
- For shots of 100 yd or less, the picker uses your **Wedge ladder** if you've filled it in.

Club Performance lists your clubs in bag order, and uses each club's type (driver, wood, iron or hybrid, wedge) to pick which stats to show. Your carry numbers aren't used there. Your strokes gained doesn't change because of the bag.

Your bag is saved in 💾 **Back up rounds** too.

11. Benchmarks: who you compare against

Strokes gained compares each shot with how a chosen group of golfers does from the same spot. **Plus = better than them, minus = worse.**

You can compare against:

- **PGA Tour** (the default)
- **LPGA Tour**
- **D1 college men** or **D1 college women**
- **Scratch men** or **scratch women**

Where to set it:

- When you start a round: **Compare my shots against**.
- Afterwards: on a round's stats page you can switch it for that round, and the numbers update straight away. You can also see the same round against all six side by side.
- The Proximity page has its own benchmark menu, which only changes that view.

Good to know: the PGA Tour numbers are published research. The other five are careful estimates, so they're best for comparing your own rounds with each other. ⓘ **About the numbers** in Settings has the details.

For a junior player, D1 college or scratch is often a more useful yardstick than the PGA Tour.

12. Send a round, add a round, and live share

Send a round to another phone (for example, you keep score and send the round to the player):

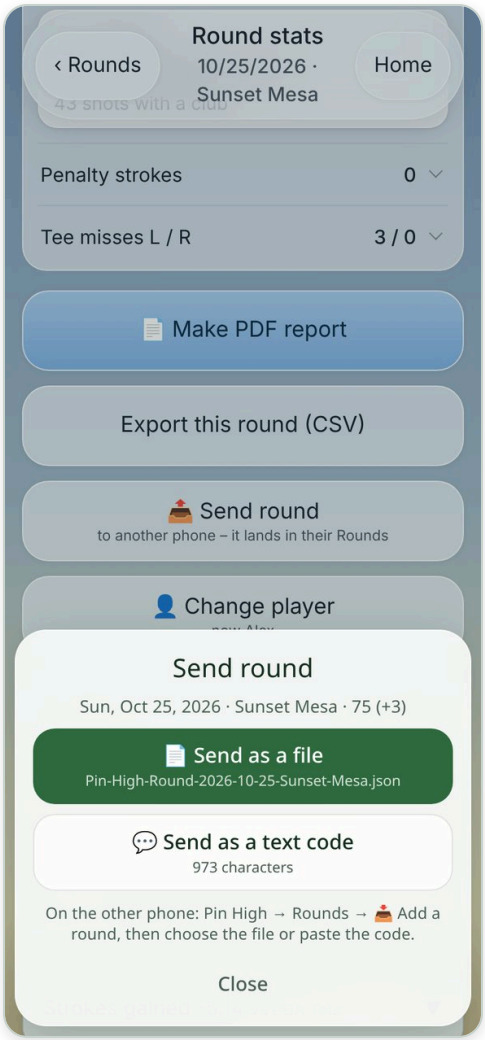

1. Open the round → 📤 **Send round**.
2. Choose 📄 **Send as a file** (AirDrop, Messages, Mail, Files) or 💬 **Send as a text code** (a code starting with PINHIGH1:).

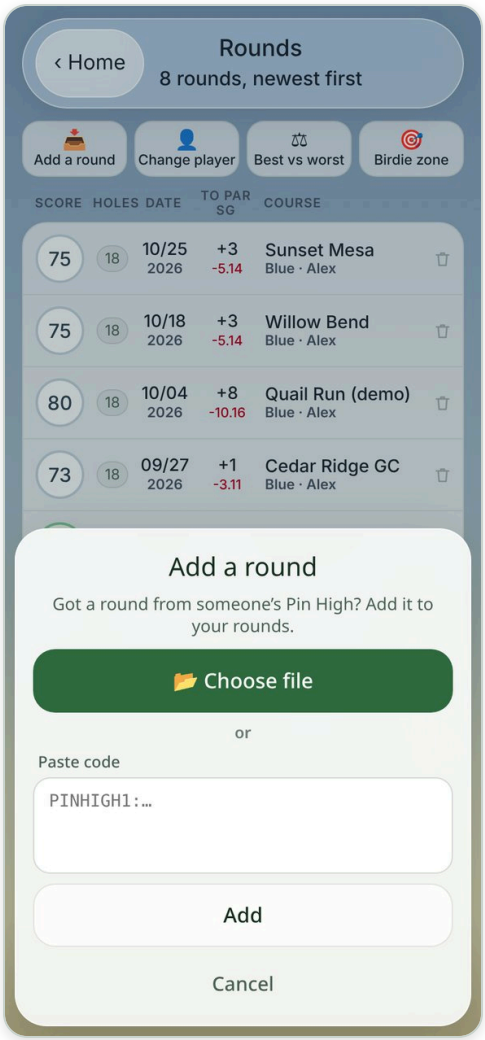

Add a round you were sent: Rounds → 📥 **Add a round** → 📂 **Choose file**, or paste the code and tap **Add**. Check the course, date and score, then tap **Add**. The same round is never added twice.

Live share (family can follow along):

1. On the hole screen, tap **Share live**.
2. Tap **Send link** or **Copy link** and send it. Anyone with the link sees the scorecard update after each hole. They don't need the app or a login.
3. Tap **Stop sharing** when you're done. The link stops working.

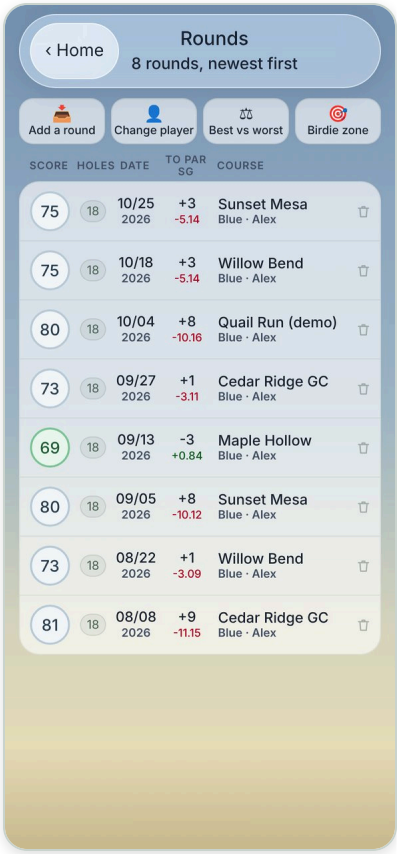

Live share needs a signal. If you lose signal, it catches up when you're back online.

13. Rounds and Settings

Rounds (Home → **+** → Rounds, formerly History) lists every saved round: score, holes, date, to par with strokes gained, and the course.

- Tap a round to open its stats, scorecard and maps.
- The score circle is green under par, blue-grey for par to bogey golf, and red above that.
- An amber pill means the round isn't finished.
- 🗑️ deletes a round. It asks first.
- The tools along the top: 📥 **Add a round**, 👤 **Change player** (move rounds to the right name), ⚖ **Best vs worst** (what separates your good and bad rounds) and 🎯 **Birdie zone**.
- Player chips filter the list when more than one golfer uses the phone.

Settings (Home → **+** → Settings, formerly Archive):

- ⛳ **Courses:** edit saved courses, pars and yardages.
- **Player name** for this phone.
- 💾 **Back up rounds** saves everything as one file. 📂 **Restore from backup** brings it back.
- **Google Drive** backup (optional), **Export all rounds (CSV)**, and ⓘ **About the numbers**.

14. Tips

- **Enter shots as you go.** It takes a few seconds per shot and is much easier than remembering later.
- **Distance is always to the pin**, from where the ball is. Use yards off the green and feet on it.
- **Always pick Loc.** The location matters as much as the distance for strokes gained.
- **Add the direction on misses and missed putts.** That's what fills in the maps and the putt-miss grid.
- **Pick a club** on full shots. Club Performance only knows the clubs you enter.
- **Tick Layup** on tee shots where you didn't hit driver on purpose, so they don't count against your driving.
- **Set the pin location** if you want the pin-location map to mean something.
- **No signal on the course?** Everything still works. Only finding a course and live share need internet.
- **Back up now and then:** Settings → 💾 **Back up rounds**, then save the file to Files or iCloud Drive.
- **Use the same web address** (or the Home Screen icon) each time, because rounds are saved on the phone for that address.
- **Install it:** in Safari, tap Share → **Add to Home Screen**, so it opens like an app.
